

GEYSER

W A T E R F I L T E R S

**THE FIRST FILTER
PROLONG SOFTENING OF HARD WATER**

**NEW TECHNOLOGY
OF HARD WATER PURIFICATION**

www.geizer.com

SOFTENS WATER UP TO 6 TIMES LONGER*

Softened water protects appliances from scale, reveals flavour of cooked products, makes skin as smooth as a silk.

*Due to combination of advanced cartridges extended softening capacity has been achieved

MAXIMUM BENEFITS:

MAXimum capacity in regard to hardness salts due to thoroughly developed combination of AquaSoft and Aragon MAX. Maximum benefit - eliminating excessive amounts calcium carbonate, GEYSER MAX saves healthy mineral composition of water.

MAXimum benefit - removal of excessive amount of calcium carbonate and saving mineral composition of water needed for human being.

MAXimum savings - Geysler MAX saves your time and money because it can work without regeneration for one year.

MAXimum comfort - compact, convenient and easy to install under sink even if the space is limited.

MAXimum effect for 12 months. No scale and excellent taste of ordinary meal like culinary delights.

A COMPARISON OF THE EFFECTIVENESS OF THE DESCALING

THE TYPES OF WATER IN THE REGIONS OF RUSSIA

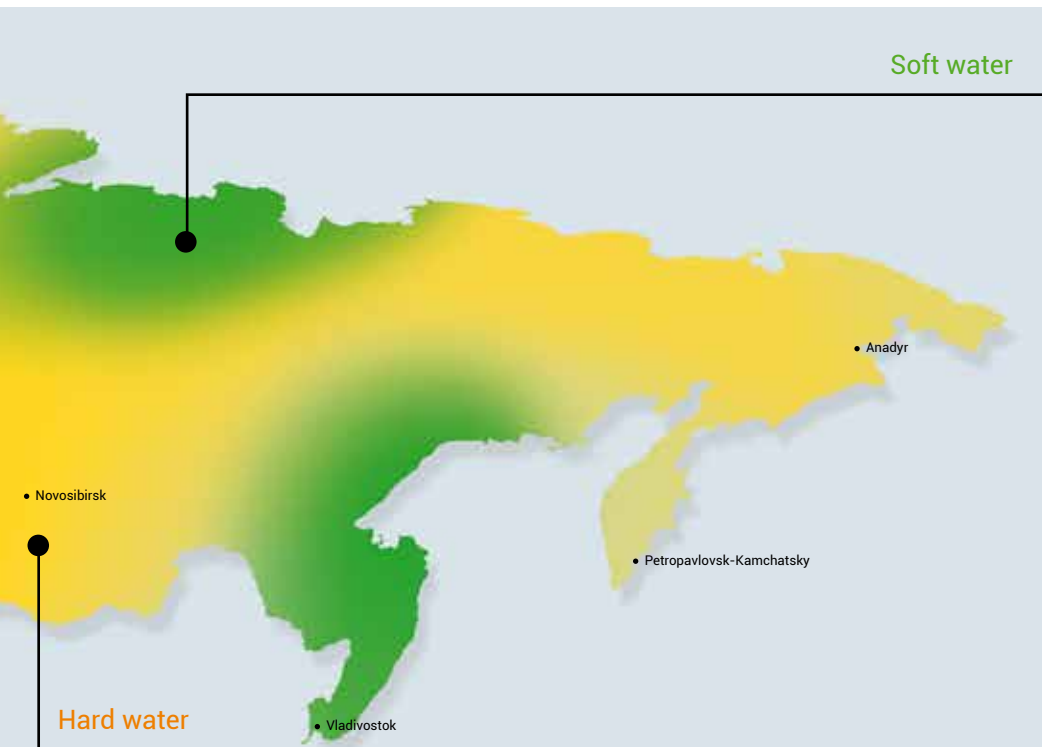

Ferruginous water

THE BENEFITS OF GEYSER MAX COMPARED WITH THE OTHER SYSTEMS

Settings	GEYSER MAX	Other water softening systems
Duration of water softening during	during the year	2 months
Operational expenses during the year	No	Reagents (salt) for regeneration
Time costs	No	Monthly
The health benefits of	Water with pleasure mineral composition	Remove all salt calcium and magnesium*

* the mineralization is recommended

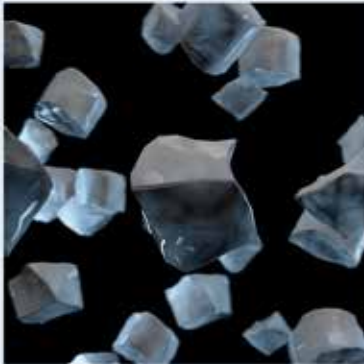

SYSTEM GEYSER MAX

**Softens water,
prevents formation of scale
by converting hardness salts (calcite)
in useful form of calcium - ARAGONITE*
(Patent No. 2286953).**

* Aragonite layers are composed of the finest pearls
and mother-of-pearl layer of the shell.

Calcite and Aragonite have different crystal lattice, therefore, their properties vary.

Microcrystals of Aragonite does not stick to the surface, easy removed by water and do not form scale, thus are additional useful source of calcium for of the human body.

WATER BRINGS HEALTH!

Soft water saturated by Aragonite is a prevention of cardiovascular diseases, arthritis, arthrosis and urolithiasis.

THE PROBLEM

On the surface of water heating devices forms scale

THE SOLUTION THE GEYSER MAX

Protects for a long time teapots, irons, humidifiers from the harmful effects of scale and your devices will continue work properly for many years.

Tea and coffee prepared with the hard water become muddy, lose their aroma and taste because of the high calcium content.

It brings a completely new level the taste of the tea and coffee – You will be pleased a luxurious fragrance and rich taste.

Hard water dries the skin, because it contains high the concentration of minerals which are not washed off, coating the skin invisible film creating a feeling of discomfort.

Soft water is cleansing and moisturiser. Recommended for daily use by International Institute of aesthetic medicine.

The design of filters "GEYSER" provides the possibility of upgrading (improvements).
With a set of cartridges No. 17 You can collect "GEYSER MAX" on the basis of previously established system.
